

# What is "Rollup Volume" in the Nikken Comp Plan?

## Rollup Volume:

When a breakaway Silver or above Consultant fails to satisfy monthly qualification requirements, his/her personal and group volume will roll up to the next qualified Silver and above Consultant. Rollup volume does not count toward breakaway Consultant's monthly PGPV qualification requirement.

Any Silver or above who has PGPV from their personal group, but doesn't do their minimum 100 PPV will have their PGPV roll up to the next qualified Upline Silver or above.

To be able to receive this PGPV from a Silver or above who has PGPV from their personal group, but doesn't do their minimum 100 PPV....the receiver has to be qualified.

To be qualified as a Silver or Gold means to have a minimum of 100 PPV and a minimum of 1,500 PGPV in that month. (1,000 PGPV for a Platinum and above)

If your downline Silvers and above PGPV rolls up to you, you will be paid your CV rebate of 20% on it, but it will not count toward your PGPV qualification.

To be qualified to receive the 6% Leadership bonuses on downline Silvers and above, a Silver needs to also have a minimum OPV (Organization PV) of a minimum of 4,000 points. (If the total organization volume was less than 4,000 points, there wouldn't be much to collect 6% on anyway...)

To be qualified to receive the 6% Leadership bonuses on downline Silvers and above, a Gold needs to also have a minimum OPV (Organization PV) of a minimum of 15,000 points, with at least 5,000 of those points coming from outside their Primary leg, and at least 1,500 of those 15,000 points coming from outside of their primary and secondary legs.

The requirements to qualify for the 6% Leadership bonuses for Platinums and above can be found [here](#).

Formula for a Gold to receive 6% Leadership Bonuses: OPV - PL needs to be at least 5,000, and OPV - PL and 2L needs to be at least 1,500. The same formula is used for all ranks above Gold: OPV - PL = 1/3 of OPV required for rank, and OPV - PL and 2L = approximately 1/3 of the first requirement. Example: Qualified Diamond needs a minimum of 100,000 OPV - PL = 33,000. 100,000 OPV - PL and 2L = 10,000.

**Very Important:** All of your PPV from personal purchases and retail sales are OUTSIDE of any of your legs!
